

AC Power Failure

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

AC Power Failure indicates that your security panel lost AC power. To ensure continued system functionality, your system needs to be plugged into the outlet.

Platform	General / Device
Content type	How-to / Configuration
Source last updated	2023-11-17

Procedure

How to resolve

1. Verify that the panel is plugged into an outlet and that the outlet has power.

If you need additional support, contact your service provider.
