

Can I be alerted when a user code is changed?

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

Yes. When a user code is changed remotely, a notification is sent to the email of the primary user on the account. This email notification is triggered automatically and cannot be turned off. To change who receives the user code change notification email, update the email address of the primary user. For more information about how to configure the email address of the primary user of an account, see [Change an email address](#).
