

# Can I schedule panel or Z-Wave lock codes on an Access Control account?

## GoSafer Security Knowledge Base

*This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.*

## Overview

Yes. However, this is only possible when the panel or Z-Wave lock's PIN code is managed through a Personal Access Plan. When using a standard Access Plan to manage multiple users, panel and Z-Wave pin codes cannot be scheduled and will allow 24/7 access. This occurs regardless of what the standard Access Plan schedule says due to scheduling incompatibilities between Z-Wave locks, panels, and Access Control doors. For more information about personal access plans, see [What is a Personal Access Plan?](#).
