

Push Notifications for Enterprise Groups

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

Push notifications for Enterprise Groups can be enabled to deliver real-time alerts directly to mobile devices. Push notification recipients can be customized based on their group level (e.g., region, specific location, etc.) ensuring the right teams receive critical updates. By integrating push notifications into the app, customers can streamline group communications, reduce reliance on SMS and email, and enjoy an enhanced in-app experience.
