

Remotely change 2GIG GoControl panel settings

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

Change some of your panel settings using the app including beeps, chimes, and temperature display format.

Platform	Mobile App
Content type	How-to / Configuration
Source last updated	2025-06-04

Procedure

Step-by-step guide: Screenshots and videos are placed with the instruction they illustrate.

Compatible panel settings can be changed using the Alarm.com app.

Note: If these options are not available, contact your service provider for more information.

To change panel settings:

1. Log in to the Alarm.com app.
2. Tap **Security System**.
3. Tap **Settings**.
4. Tap the setting to be configured.
5. Tap the desired value.
6. Tap **Save**.

Compatible panel settings:

Setting	Description
Silence Trouble Beeps at Night	If this feature is enabled then trouble conditions such as AC loss system low battery RF low battery fail to communicate cell radio faults will not be audible between the hour of 10 pm and 9 am. For UL 985 installations, this feature must be disabled.
Temperature Display	Select if the temperature is displayed in Fahrenheit or Celsius
Closing Acknowledgment Sound	Enable or disable the sound for an arming acknowledgment at the end of the exit delay
Data and Time Format	Select the format date and time format
