

Smart Home Skill - Interact with lights through Amazon Alexa

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

Lights synced with the Amazon Alexa app can be controlled using many different commands. Below are some example commands for a light with the name Office Light.

Platform	General / Device
Content type	Reference
Source last updated	2025-08-13

Procedure

Example commands

To request the status of a light

"Alexa, is my Living Room Light on?"

To turn the light on or off

“Alexa, turn off the Office Light.”

“Alexa, switch on the Office Light.”

“Alexa, flip off the Office Light.”

To control a dimmable light in addition to on/off commands

“Alexa, dim the Office Light to 25 percent.”

“Alexa, increase the Office Light by 50 percent.”

“Alexa, make the Office Light 25 percent brighter.”

Frequently asked questions

How do I control a specific light?

To control lights using the Smart Home skill, you must use the exact name of the light or group name as defined by Amazon Smart Home. This is different from the Alarm.com skill where you can give commands without mentioning a specific light.

For more information on group interactions, see [Smart Home Skill - Group devices together in Amazon Alexa](#).
