

What kind of rules can I set up with my locks?

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

The following event-triggered rules can be configured with Z-Wave locks: For more information about how to set up other automation rules, see [Rules](#).

Platform	General / Device
Content type	How-to / Configuration
Source last updated	2023-12-11

Procedure

The following event-triggered rules can be configured with Z-Wave locks

Rules which automate locks when the system arming state is changed. For more information, see [Create/edit an event-triggered lock automation rule](#).

Rules which automate the security system based on a change in a lock's status. For more information, see [Create/edit an event-triggered security system automation rule](#).

Rules which unlock a single door when fire, smoke, or CO is detected. For more information, see [Create a fire-triggered unlocking automation rule](#).

Rules which lock a single door based on a specified contact sensor closing. For more information, see [New Rules Builder Overview](#).

Important: Setting up this rule will disable auto-relock on the lock.

For more information about how to set up other automation rules, see [Rules](#).
