

How do I configure an input to trigger one or multiple Access Control doors?

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

An input can be configured to trigger one or multiple Access Control doors with an Event-Triggered Rule using the GoSafer Security customer portal (powered by Alarm.com).

Platform	Customer Website
Content type	How-to / Configuration
Source last updated	2025-06-04

Procedure

To configure an Event-Triggered Rule to trigger Access Control doors

1. Log in to the GoSafer Security customer portal (powered by Alarm.com).
2. Click Automation.
3. Click Rules.

4. Click Add New Rule and select Event-Triggered Rule (if applicable).

5. Enter the desired name for the rule.

In Automate My, select Doors.

In When this event occurs, select Input Activity.

1. Select which input and input action should trigger the doors.

In Perform this action, select the desired gate function.

In Select Devices, select which doors the rule should apply to.

In During these time frames, select the desired time frames for the rule to operate.

1. Click Save.
