

What is enable advanced networking and why does it need microphone permission?

GoSafer Security Knowledge Base

This operational reference is organized for GoSafer Security customers and staff. Alarm.com product names are retained where required for technical accuracy.

Overview

If a video device is having difficulty establishing communication with your browser, the video platform may request microphone access. Granting this request only provides the video platform with additional information about your internet connection to try to connect in a different way. Important: Alarm.com never listens to your microphone nor uses any of your microphone data on the GoSafer Security customer portal (powered by Alarm.com).
